

## E-Type

The ultimate showpiece of the accuro-korle collection is our E-type, a bold style statement designed to be wall mounted to provide a focal point within a contemporary setting.

A geometrical wall sculpture with brushed stainless steel finish; this is a true piece of art. The E-type breaks with convention to prove that radiators are no longer functional plain utility devices to be hidden from view.

Harmony of Design and Quality

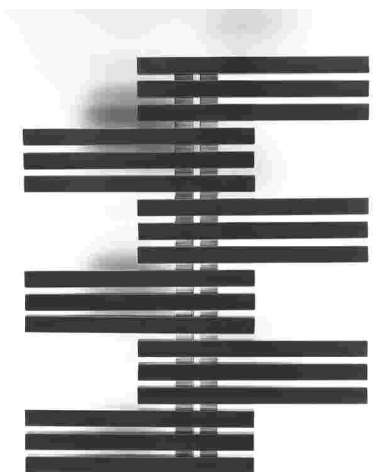

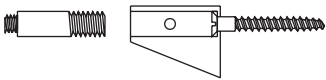

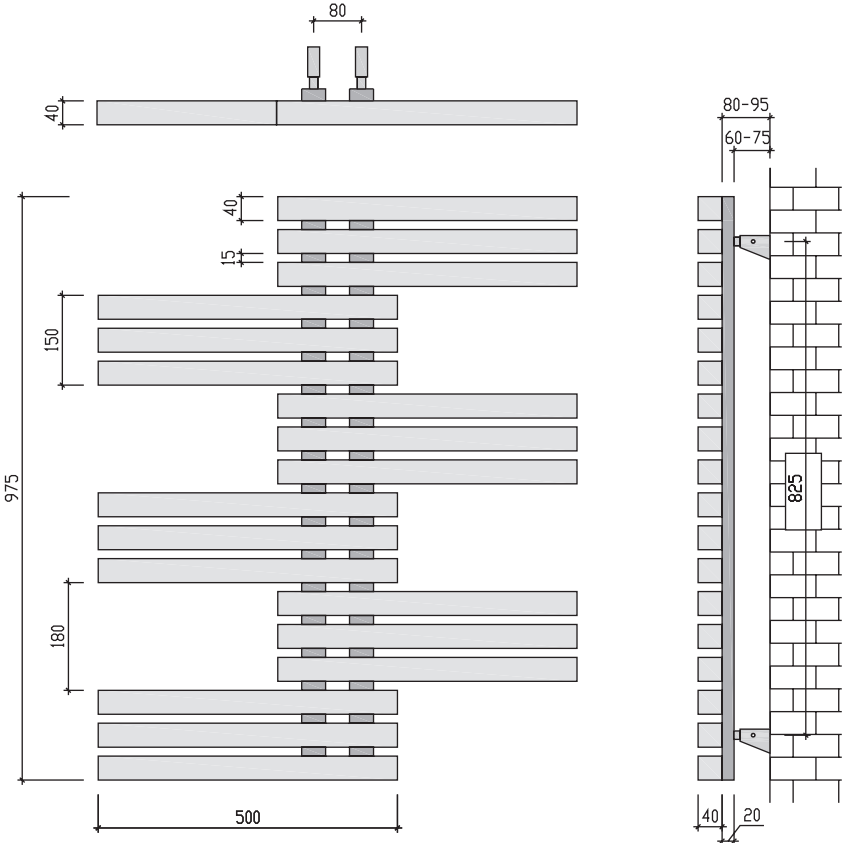

# E-Type

## Guide to estimate your heat requirement:

All Heat Measurements are +/- 5%

1. Calculate the room volume in cubic metres : Length (m) x Width (m) x Height (m) = Volume (m<sup>3</sup>)

2. Heat Requirement in BTU per hour:  
 Room Volume (m<sup>3</sup>) x 153 =  
 Estimated Heat Requirement in BTU/hour (BTU/hour divided by 3.96 = Kcal per hour)

E-TYPE

### Specifications Chart

Model	Overall Dimensions mm			Center to Wall	Tubes	Tube Size/mm	Heat Output at 90-70-20			Water Content ml.	Net Weight kg.
	Height	Width	Depth				BTU	Watts	Kcal / hr
